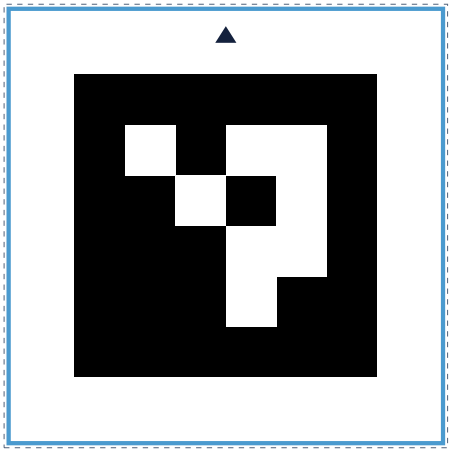
Regatta Lens · tracking markers

Print at 100% / "Actual size" on matte paper or sticker stock. Glossy finishes glare under lamps and break tracking.
The small triangle marks each marker's TOP edge. Cut on the dashed line and keep the white border; it is part of the marker.
Sizes here match the app defaults (wind + course 40 mm, boats 20 mm, course marks 25 mm). Change them in Settings if you print others.

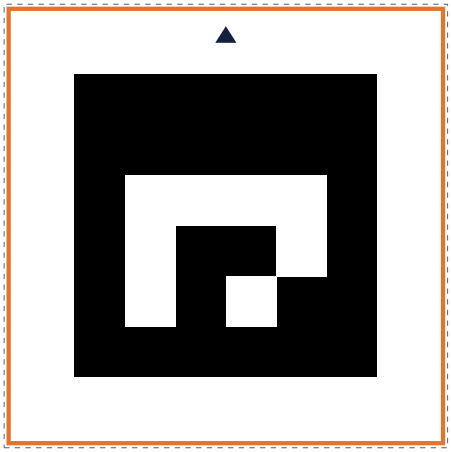
50 mm. Measure this. If it is off, your printer scaled the page.

Wind dial

Wind (0) goes on the ROTATING arrow hub, top edge pointing upwind (12:00 at the start). Course (1) goes on the FIXED base, top edge toward the finish.



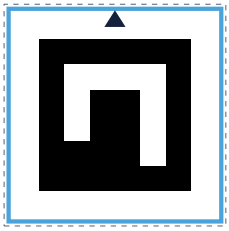
WIND · id 0
rotating hub · top = upwind



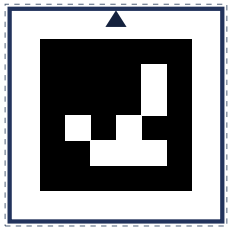
COURSE · id 1
fixed base · top = toward finish

Boats

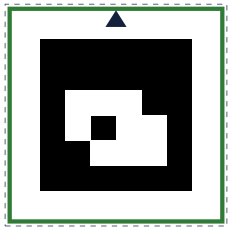
One per meeple, stuck flat on top. Top edge = the bow. Print the page twice if you want spares.



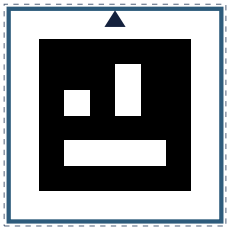
BLUE · id 10
top = bow



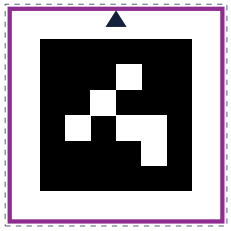
NAVY · id 11
top = bow



GREEN · id 12
top = bow



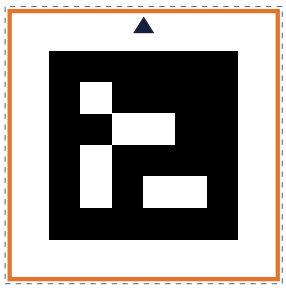
DARK BLUE · id 13
top = bow



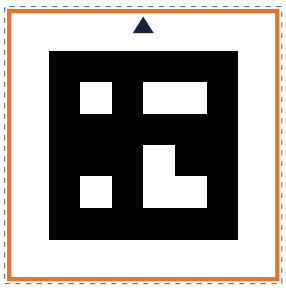
PURPLE · id 14
top = bow

Course marks

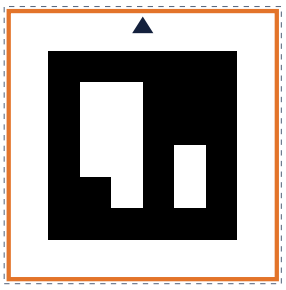
On the TOP of each cylinder. A + B = finish line (A on the left looking upwind). C + C = start line.



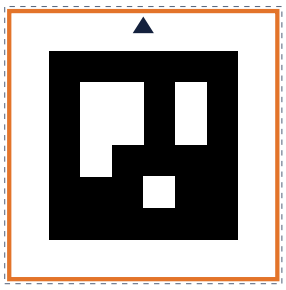
FINISH A · id 20
top = upwind



FINISH B · id 21
top = upwind



START C · id 22
top = upwind



START C · id 23
top = upwind

ArUco 4x4 markers, ids 0-23 (same bits as OpenCV DICT_4X4_50). Plain black-and-white squares track far better than QR codes at this size.
